

## Economic comparisons between selected Roundup Ready and IP soybean varieties

Several assumptions were made in this exercise:

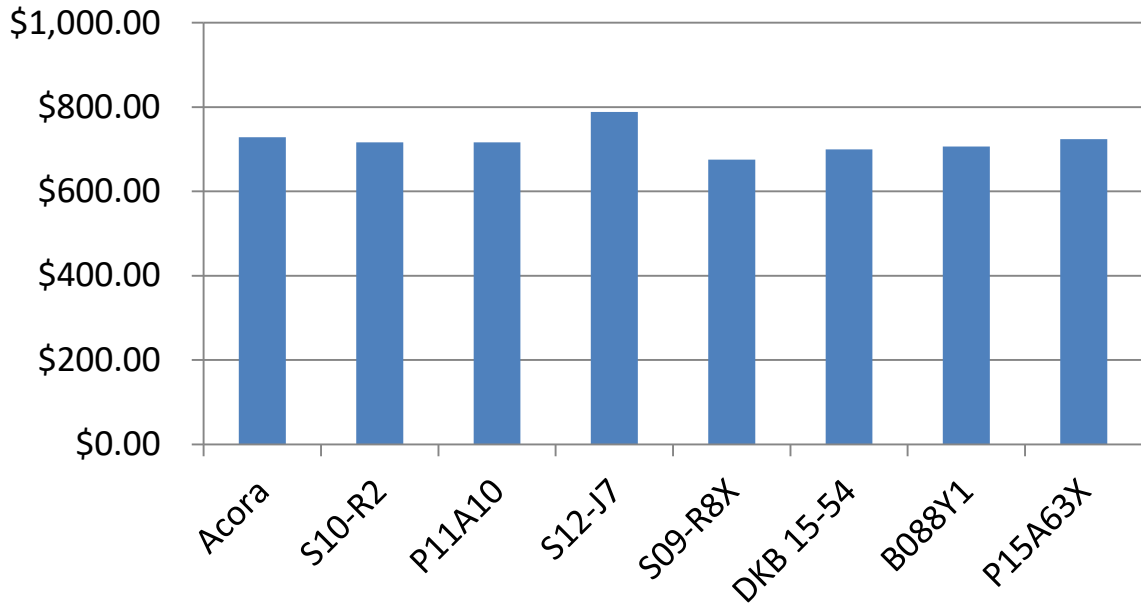

- Seed cost @ listed price of \$65/110k unit (IPs) and \$85/140k unit (Roundup Ready), both seeded @ 180,000 seeds/ac
- Herbicide costs of \$25/ac in the Roundup Ready, \$52.50/ac for IPs
- Soybean price of \$13/bu plus premium, as applicable
  - o Updated premiums (as of November 25) can be found at <http://www.ondrejicka.com/index.cfm?show=10&mid=23>
- “Past performance does not guarantee future results” – talk to your Huron Perth Ag sales rep about placing the right soybean on your acres

### Net Returns (\$/ac) after seed and herbicide cost of selected IP and RR soybean varieties in the 2800 CHU range.

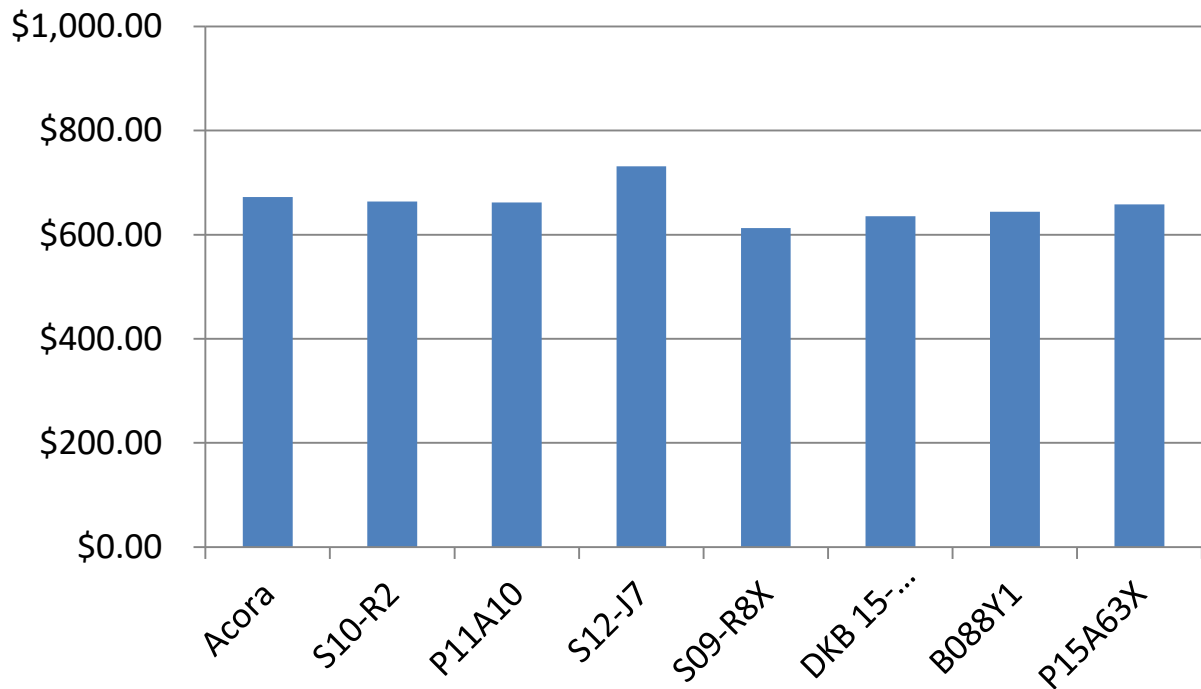

Yield data retrieved from <https://www.gosoy.ca/performance.php>, two year Exeter location trial average. Soybean price at \$13.00/bu.

**Net Returns (\$/ac) after seed and herbicide cost of selected IP and RR soybean varieties in the 2800 CHU range**

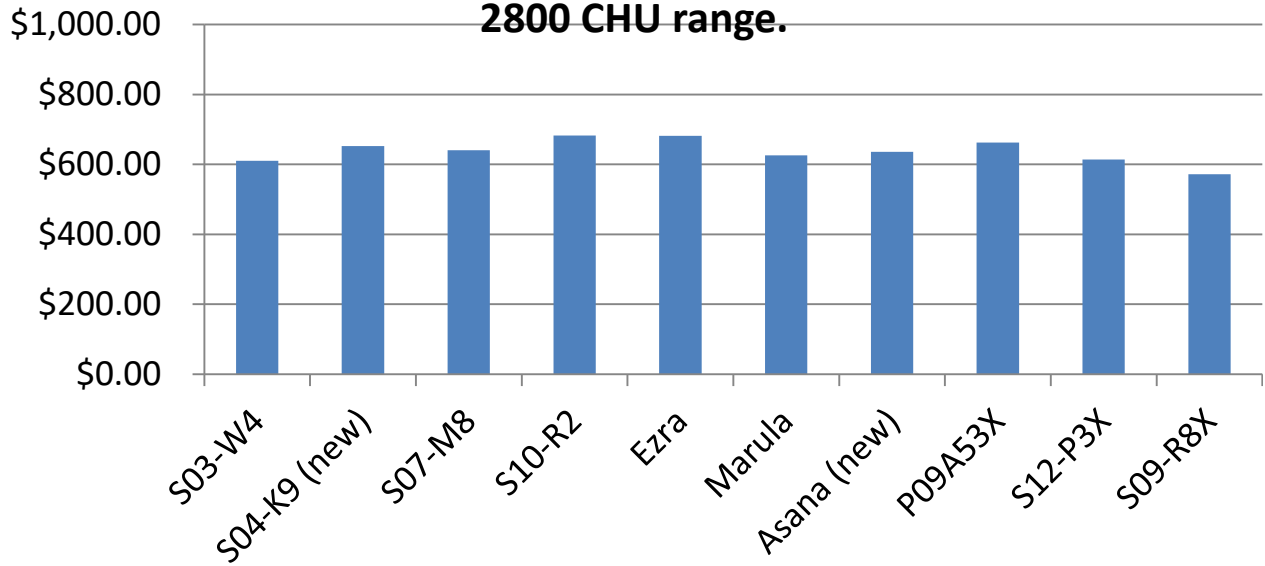

Yield data retrieved from <https://www.gosoy.ca/performance.php>, two year trial average (across all locations). Soybean price at \$13.00/bu.

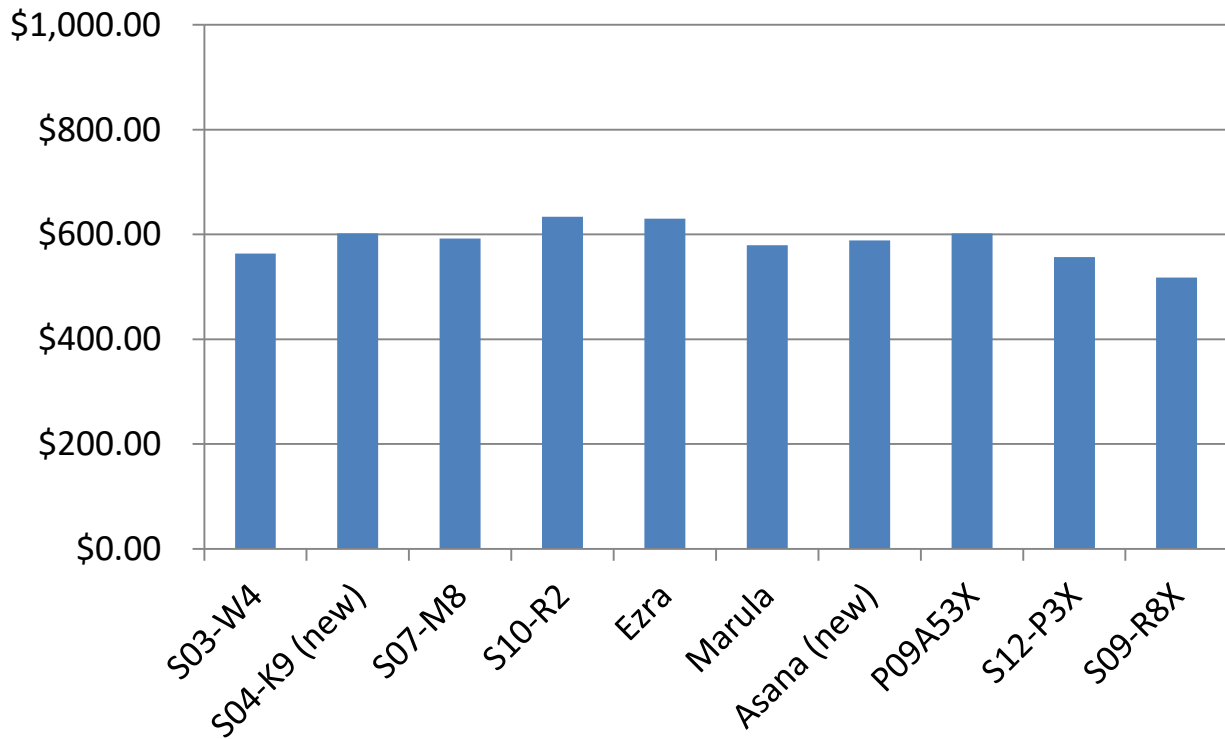

Yield data retrieved from <https://www.gosoy.ca/performance.php>, two year trial average (across all locations). Soybean price at \$12.00/bu.

**Net Returns (\$/ac) after seed and herbicide cost for selected IP and RR soybean varieties in the 2500-2800 CHU range.**

Yield data retrieved from <https://www.gosoy.ca/performance.php>, two year trial average (across all locations). Premium assumed at \$3.00/bu for the new varieties, soybean price at **\$13.00/bu**.

Yield data retrieved from <https://www.gosoy.ca/performance.php>, two year trial average (across all locations). Premium assumed at \$3.00/bu for the new varieties, soybean price at **\$12.00/bu**.
